

IN THE SPECIFICATION

Please insert the following heading after paragraph [0004]:

--SUMMARY OF THE INVENTION--

Please replace the abstract with the following:

--An information processing apparatus, method, and program capable of detecting ~~The invention makes it possible to detect~~ the characteristics of text data, and ~~to analogize~~ analogizing potential hidden meaning in the text data. A word cutting unit [[3]] performs a word-cutting process on the text data input from the input unit [[1]], a syntax-analysis unit [[4]] performs syntax analysis and a thesaurus-creation unit [[5]] creates thesauruses from the results, then after performing word cutting and syntax analysis again, a thesaurus-sorting unit [[7]] performs sorting, and a frequency-of-appearance unit calculates the frequency of appearance of the thesauruses, a correlation-coefficient-calculation unit [[11]] calculates correlation coefficients between thesauruses, a correlation-coefficient-total-calculation unit [[13]] for each thesaurus calculates the total of the correlation coefficients for each thesaurus, the graph-creation-display unit [[15]] creates a graph based on the frequency of appearance and total of the correlation coefficients for each thesaurus.--
